

IntellaFlo

Finance Automation Solutions

A Single Platform for Finance Automation

MTS Software Solutions offers finance automation solutions built on **IntellaFlo** - a web-based workflow management platform that streamlines document processing and payment application. **IntellaSpend** is an accounts payable module that provides fully configurable workflow processes to streamline invoice processing and spend management (T&E). **IntellaCash** is an accounts receivable module that automates and accelerates order-to-cash processing, remote deposit capture, and cash application. These modules can work together or independently to significantly reduce operating costs, save time, and achieve higher productivity without adding additional resources.

How it works...

MTS Software Solutions combines our expertise and consultative methodology with the following product features to maximize your return on investment:

- **Capture** – Capture transactions in any format at their point of origin.
- **Classify** – Automatically identify transaction type.
- **Extract** – Pulls data and inserts into matching algorithms
- **Automate** – Inserts data into configurable workflows
- **Integrate** – Seamlessly connects with finance management systems
- **Archive** – Instant, easy access to your transactions
- **Analyze** – Proactive and real-time reporting to provide insights
