

IntellaSpend

Accounts Payable Automation

What is IntellaSpend?

IntellaSpend is an Accounts Payable (AP) solution that automates and accelerates invoice data capture, PO-Compliant as well as non-PO invoice processing and T&E/P-card expense management. The solution consists of multiple modules that can work together or independently to significantly reduce operating costs, save time, and achieve higher productivity without additional resources.

Whether you are currently scanning and indexing invoices manually or receiving them via email, IntellaSpend captures and centralizes the documents and data, extracts relevant information, and applies rules-driven, automated workflows to simplify, streamline, and accelerate the AP process. Invoice data and supporting documentation are captured and matched automatically to your ERP – allowing staff to focus less on manual effort and more on managing exceptions and improving vendor relationships. The T&E/P-card module is a tool to streamline your spend.

How it works...

MTS Software Solutions combines our expertise and consultative methodology with the following product features to maximize your return on investment:

- **Capture** – Capture transactions in any format from any source
- **Classify** – Automatically identify transaction type
- **Extract** – Pulls data and inserts into matching algorithms
- **Automate** – Route data into configurable workflows
- **Integrate** – Automatically match data to ERP/Accounting systems
- **Archive** – Instant, easy access to your transactions
- **Analyze** – Proactive & real-time reporting to provide insights

Key Benefits:

- Improve Visibility & Audit Support
- Reduce Invoice Processing Time
- Reduce Cost per Invoice
- Leverage Early Payment Discounts
- Enable Dynamic Discounting
- Enhance Working Capital Optimization
